[Home](#) >

Showing the world of chemistry
and nano science in beautiful
interactive imagery.

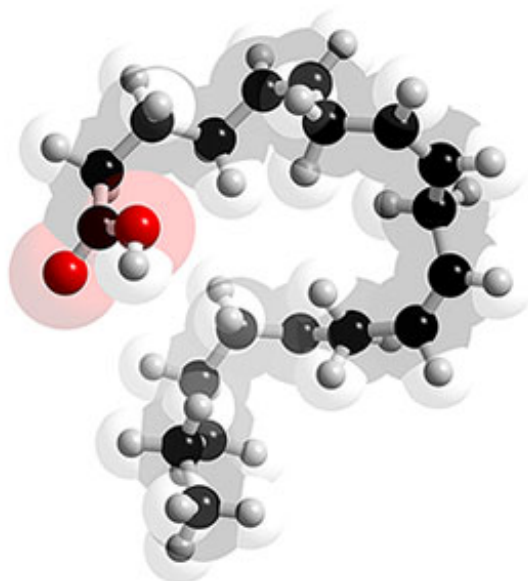

This web site highlights areas of
the chemical world and illustrates
the structures behind the words.
It also provides background
information about the science of
the chemicals.

See the structures of small
molecules, medical drugs,
biological super-structures -
enzymes, proteins, DNA, & virus -
and the material world nano
structures, all with colourful
illustrations and interactive 3D.

This web site uses [Jmol](#) Java
technology to display the
interactive 3D models, please visit <http://www.java.com> if you need to get Java - most MS
Windows, Mac OS and Linux/UNIX systems have this already installed.

The web site is maintained by [Dr Karl Harrison](#) and has been updated regularly since Jan 1996.

October 2008 Update.

click on the picture above to interact
with the 3D model of Arachidonic acid
